## Says

What have we heard them say?
What can we imagine them saying?

Aircraft
designed to
transport
large good.

dataset is a comprehensive collection of information on airports.

IDs,name

ICAO

aliases,IATA and

codes,callsigns

country of origin.

Air transport networks can be defined worldwide as well as for one region .

the properties of small-world networks and scale - freenetworks.

It improve the

economic

society.

welfare of a

allows people

from different

countries to

international

boundaries.

cross

Aie transport is currently used in almost all industrial sectors and distribution chain.

connectivities at

the same time.

the network have large connectivities and long distance

air frieght transport are speed reliability terms of cargo security.

AIR FREIGHT

Does

What behavior have we observed? What can we imagine them doing?

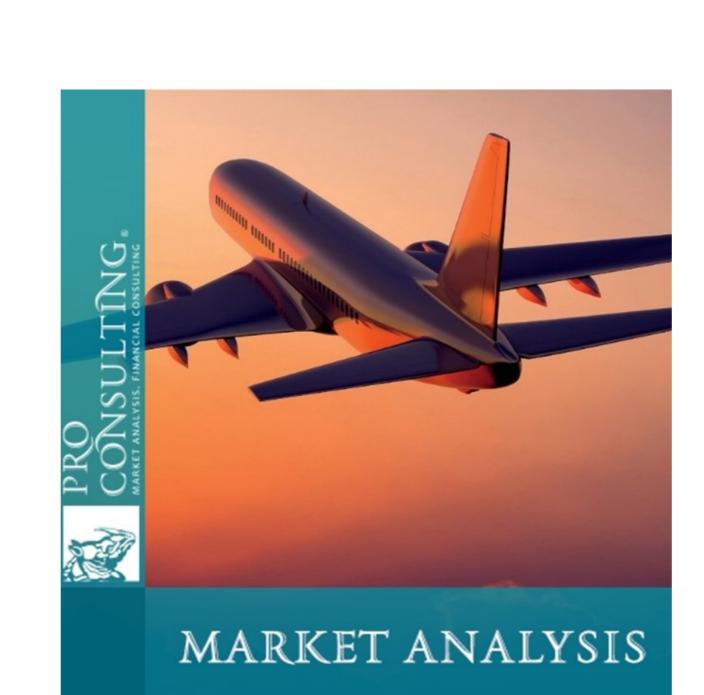

## **Thinks**

What are their wants, needs, hopes, and dreams? What other thoughts might influence their behavior?

It essential for global business operations.

Products
internationally or
to deliver samples
and documents
related to foregin
trade operations.

limitations, skilled workface shortages. high-cost structure.

Infrastructure

we aim to reduce wasted time and eliminate aircraft ,during mission.

Most companies use air transport to market goods.

Accidentprone,large investment,requires skill,risky.

Unlocking Insights
Into the Global Air
Transportation
Network

Welcome

These cannot be detected without precision satelites.

small carrying capacity.

Air transport can involve higher costs than other options, and is not suitable for all goods.

High cost .this is significanty more for its services than land,rail and water transportation.

**Feels** 

What are their fears, frustrations, and anxieties? What other feelings might influence their behavior?
